PERSONAL PROTECTIVE EQUIPMENT (PPE)

WE PROTECT THOSE WHO PROTECT US

MOBILITY. SECURITY. **PASSION.**

 **RHEINMETALL**
GROUP

RHEINMETALL GROUP – EXTENSIVE PROTECTION FROM A SINGLE SOURCE

Rheinmetall helps to protect human life with numerous products from its existing portfolio. The range we offer includes a wide selection of personal protective equipment as well as solutions for civil protection.

COVID-19: Rheinmetall already supplies personal protective equipment (PPE) to government agencies in Germany. As part of the fight against the coronavirus pandemic, Rheinmetall wants to make a contribution to our country and society.

In this context we have started to mobilise our established international network of Rheinmetall companies and suppliers.

We are anxious to protect those who protect us: doctors, nurses and medical teams – and everyone who is there for us when we need help. This applies to both the civil and military sphere.

We offer a high-quality product range of personal protective equipment from qualified sources of manufacture. It goes without saying that all protective articles come with certificates confirming compliance with the safety regulations and quality standards.

Tapping into production sources via a global network

Logistical and technical challenges have been overcome thanks to close cooperation within the Rheinmetall Group and with our suppliers. Our processes and networks ensure that we are a reliable and dependable partner during the challenging time of this pandemic.

Prod. No.	Product	Description	Image not binding
06601602	FFP2 masks without valve (or similar) Respiratory mask FFP2 according to EN 149, KN95 according to GB2626	Filter performance at least 94% Exhalation resistance max. 4 mbar (FFP2) Non-sterile
